Checks.

Who I Am:

I am a location sound mixer and sound supervisor with 20 years of on location experience. In the first 4 years of my career I was mentored by Bill Moffett of Moffett Productions and mastered the skill of producing radio and tv commercials for local and national clients. For the past 16 years I have been mixing location sound for narrative, documentary, reality tv, commercials, and corporate videos.

I have experience on long format documentary work in remote locations such as Kuwait and Alaska. This requires ample planning for the various situations that might be encountered as well as equipment failure and file backup. I have worked on documentaries involving astronauts, billionaires, drug addicts, at risk youth, immigration and many other sensitive topics. I am comfortable in most situations as long as the safety of the crew is a priority.

Equipment:

I use Sound Devices and Zaxcom Recorders with Lectrosonics, Wisycom, and Zaxcom wireless as options depending on the needs of production. I can offer Ambient Timecode Slates and Timecode Boxes as well as Tentacle Sync Boxes.

I have custom audio and timecode solutions for all production cameras being used today. The wireless transmitters I use have worldwide frequency compatibility and can record on the transmitters.

Client Services:

- DropBox File Access
- Location Audio to Zoom Uplink
- Adobe Frame I.O. C2C Uplink
- Logic Que'd Playback System

Technical Jargon:

Zaxcom Nova Package:
